

I use XM Radio, every day of my life. I have had it for a number of years now, and also other members of my family use. XM Radio should have the freedom to carry any news it wants, weather or traffic. It is a 21st century method of distribution. President Bush is all for development of future space and satellite, and other communications projects. The whiners and complainers in this matter are free to put up their own satellites if they wish.
